### Lavabos

**Lavabos** Lavabos are also known as wall fountains. They are a wonderful outdoor garden décor. They can make a blank empty wall a focal point in your outdoor living area. They are used as outdoor garden fountains that attach to the wall. They are available with or without tiers so they can easily provide the sound of running water. When they are used as an active outdoor garden fountain they add a similar ambiance and relaxation of a regular sized outdoor garden fountain. Because of their ability to enhance the ambiance they are also very popular as containers for plants for a garden wall, or a wall in a foyer or entry way. They are the perfect outdoor garden décor for that empty space in which you just can't decide what to put there.
