### Garden Urns

**Garden Urns** Garden urns tend to be more vertical than the outdoor planters and have more room for roots; they can accommodate more and larger plants. They are a fabulous way to enhance the beauty of your outdoor garden decor, but are not limited to outdoor use. Our wide variety and sizes of urns are popular for decorating inside and outside and can enhance the beauty of your home in various ways. Garden urns are a wonderful addition to your foyer or front porch, and the foliage can easily be changed out to accommodate the decor of the spring, summer, fall and winter season. We carry some large enough to be used indoors for trees or small enough for a fabulous table or mantle display. They are a great way to add to your deck, garden or poolside outdoor decor. Vergil's™ home and garden outdoor garden urns are made of cast aluminium which guarantees you a life time of enjoyment. The outdoor garden decor we provide is light weight, long lasting and will not rust. The benefits of these features are as follows: they can be moved, painted or arrangements changed out more easily than alternative materials. They also do not crack because of freezing weather and will not leave rust spots on your porch, poolside or patio. They are a wonderful investment in a timeless classical style.
